ABOUT US

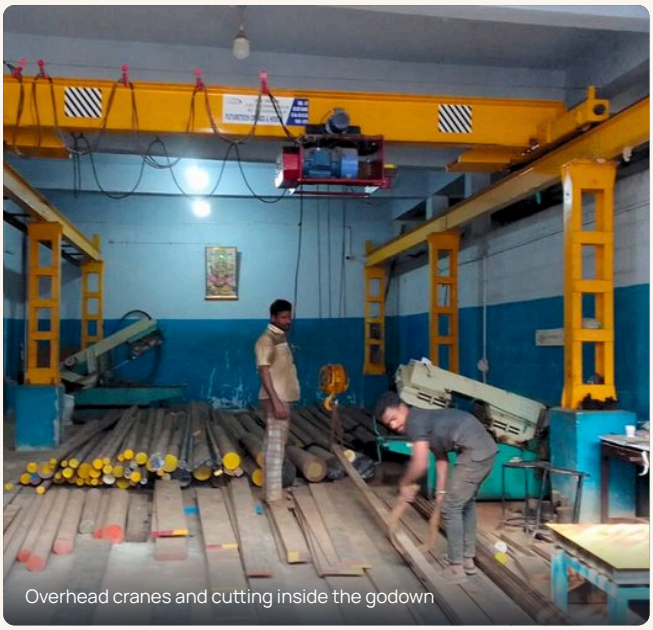

Certified steel stockists in the *Temple City*

Sun Steel Traders supplies the factories, workshops and builders of southern Tamil Nadu with the right material, in the right size, on the day it is needed.

We are certified dealers and stockists in Madurai, serving every kind of manufacturing industry. Whether the order is a single bar or a truckload, the answer is the same: we hold it, we cut it, we deliver it.

Why customers stay with us

- **Your size, your quality.** Material in the specific size and grade you specify, even in small quantities.
- **Deep stock.** Big godowns with a wide range, including rare compositions that others do not carry.
- **25 years of hands-on experience** in steel and metals.
- **Quick delivery** without hassles, loaded by our own crane and handling team.
- **Market price** and a timely response, every time.
- **We never say "No"** because of stock availability: if it can be sourced, we find it.

CUTTING & HANDLING

Cut to size, *in our own godown*

SUN STEEL TRADERS

Band saw cutting an alloy steel round bar, with coolant

You tell us the length. We cut it, weigh it and load it, so it arrives ready for your machine.

Our godowns have built-in cutting and material-handling facilities, run by a dedicated handling team. Nothing leaves as a full-length bar unless you want it that way.

Rods · Pipes · Plates · Bars · Flats · Sections

How an order is handled

1 Tell us what you need
Grade, shape, size and cut length: by phone, WhatsApp or the enquiry form on our website. A drawing helps.

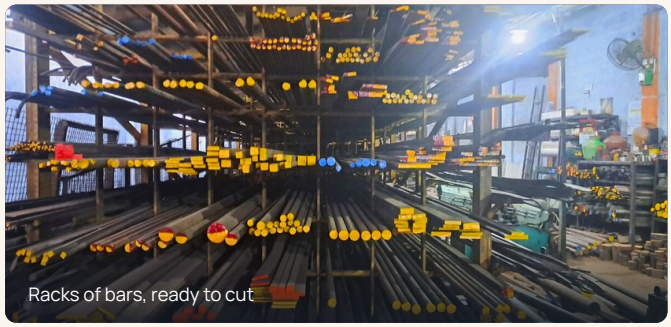

2 We cut it
Band saw cutting holds **±1 mm** on length. Plate and sheet cutting on request. Small quantities are welcome.

3 We weigh it
Pieces are weighed on the platform scale, so your invoice matches what is on the truck.

4 We load and deliver
The overhead crane loads plates, beams and heavy rounds straight onto your truck. Quick delivery across Tamil Nadu.

Formulas. Round = $\pi \div 4 \times d^2 \times \rho \div 1000$ · Square = $d^2 \times \rho \div 1000$ · Hex = $0.866 \times d^2 \times \rho \div 1000$ · Flat = width × thickness × $\rho \div 1000$ · Pipe = $\pi \times$ (OD − wall) × wall × $\rho \div 1000$. Dimensions in mm, density ρ in g/cm³, result in kg per metre. Weights are theoretical; invoices use the weighed or mill weight, which can differ by ±2–3% because of rolling tolerances.
